

Hifz Companion

A simple guide for new users

Memorise the Qur'an one page a week.

Free · no account · works on any phone or computer.

mazhar17.github.io/hc

THE METHOD

Three kinds of work, every week

This is how huffāz have always worked. The app simply keeps track of it for you.

1

Sabaq

The new lesson.

One new page each week — or a half, a third or a quarter of a page if that suits you better.

2

Sabqi

Recent revision.

The pages you learned in the last few weeks, revised again and again until they are firm.

3

Manzil

Long-term revision.

Everything older, in a steady rotation, so that what you have learned is not lost.

You never have to plan any of this: the app works out what to revise each day and shows it on the Today screen.

BEFORE YOU START

What you need

1

A phone, tablet or computer

Any modern browser — Chrome, Safari, Edge or Firefox.

2

Internet the first time

Afterwards the app can be kept on the device and used offline.

3

Nothing else

No account, no password, no payment, no advertisements.

Open: mazhar17.github.io/hc

On a phone: open the link, then the browser menu → “Add to Home screen”. It then opens like an ordinary app, with its own icon.

TWO QUESTIONS, THEN YOU ARE READY

The first time you open it

1

“Continue with the built-in Mushaf”

The whole Madinah Mushaf — all 604 pages — is already inside the app.

2

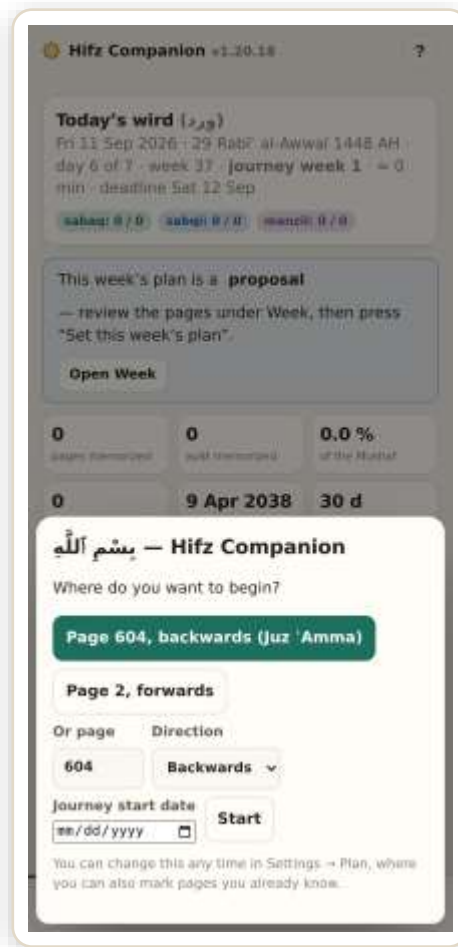

“Where do you want to begin?”

Most people start at page 604 and work backwards through Juz ‘Amma. You may also type any page number.

✓

That is the whole setup

Everything else can be changed later in Settings → Plan.

Finding your way: five tabs

1

Today

What to do right now. Start here every day.

2

Study

The Mushaf page, the recitation, and the learning tools.

3

Week

This week's plan — and the message for your teacher.

4

Progress

How far you have come: the map, the calendar, your streak.

5

Settings

Set once, then forget.

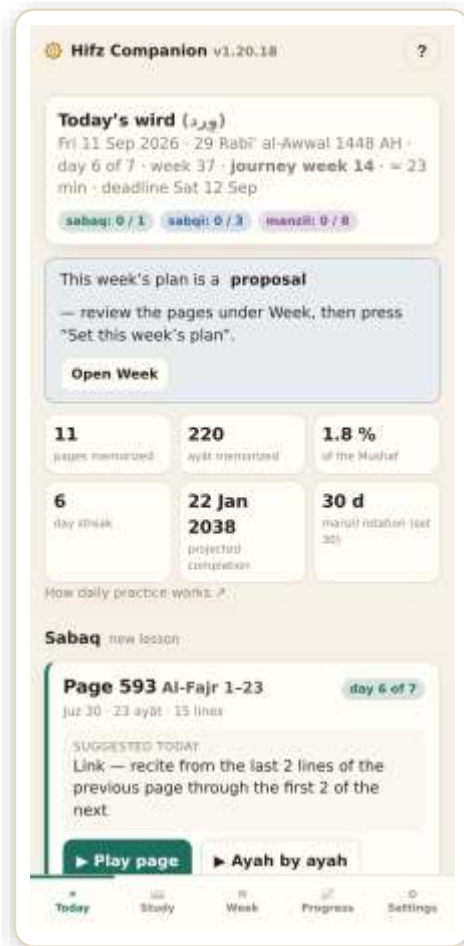

The ? button at the top of the screen opens Help & About at any time.

TAB 1

Today — your daily work

- The date, your journey week, and roughly how long today will take.
- Three counters: sabaq (new), sabqi (recent), manzil (older).
- The Sabaq card names the page and suggests today's task — “learn the first segment”, “recite the page three times”, and so on.
- Three buttons: “Play page”, “Ayah by ayah”, and “Open in Study”.
- When you finish: tap ✓ Practised today. When the page is truly memorised: Mark page complete.

If you only ever follow the Today card, you are doing the method correctly.

TAB 3

Week — the plan, and your teacher

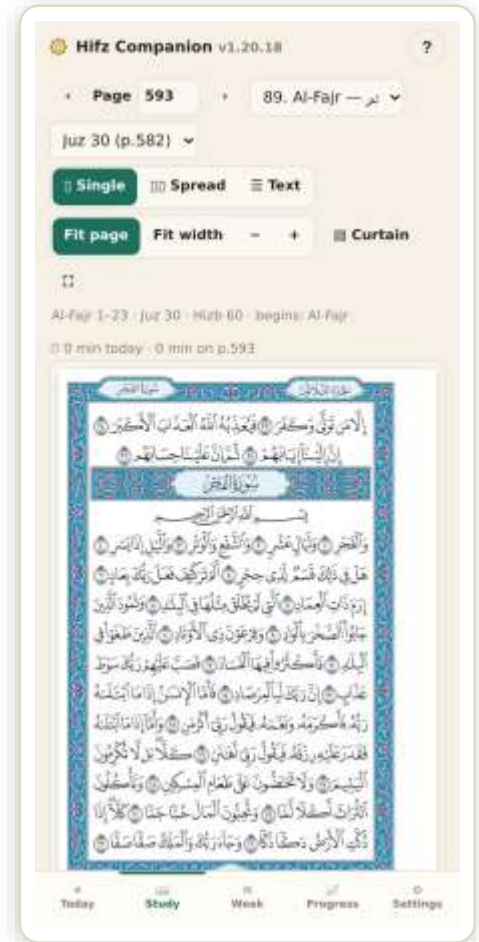

- The app proposes the week: one new page, the recent pages, and a few older ones for rotation.
- Change anything you like, then press “Set this week’s plan”.
- “Download audio” keeps the whole week’s recitation on the device — useful before travelling.
- “Share with teacher” writes a ready-made message of what you memorised and revised: copy it into WhatsApp.
- “Import weekly lesson”: paste the week’s message from your teacher and the app reads the ranges and dates into the plan — after you check the preview.

You can leave the proposal exactly as it is — it is already a sound plan.

Study — the page itself

- The real Madinah Mushaf page, the same one you hold in your hands.
- One page or a two-page spread; zoom in and out — every part of a zoomed page can be reached.
- On a phone, swipe left or right to turn the page; on a computer, the ‹ › arrows at the edges. In full screen the small X in the corner takes you back.
- ≡ Text shows the same page as text — meanings, translations, drills.

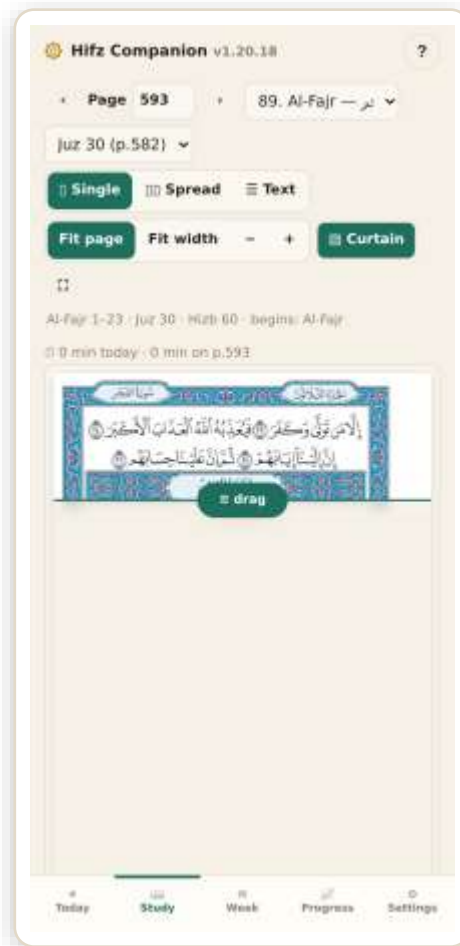

Memorise from the printed page: the shape of the page is part of how the eye remembers.

The Curtain — test yourself

- Press Curtain on the printed page: it is covered. (It works on the Mushaf page, not in Text view.)
- ▼ reveal shows one line; ▲ hide takes it back.
- Recite the line from memory first — then reveal it and check.
- While the curtain is on, meanings, tafsīr and the video lesson are hidden, so nothing gives you the answer.

Reciting from memory and checking is what builds hifz — not re-reading.

Listening to the qari

- Choose from which ayah to which ayah, and which qari.
- “Repeat each ayah” 3–5 times is the classic way to take a new ayah.
- “Silence after each ayah” leaves a gap for you to recite it back.
- New: the English translation after each ayah, and the tafsīr read aloud by the device.

25 qurrā’ are available, ‘Abdul Bāsiṭ by default. Audio can be downloaded for offline use.

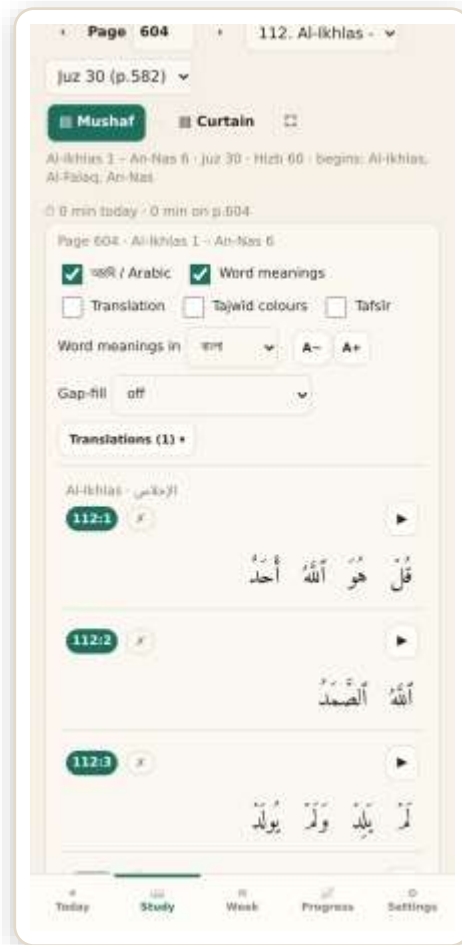

The screenshot shows the 'Listen' app interface with the following settings:

- Page 593** | **Page 593 ± 1 ayah**
- Súrah Al-Fajr** | **Juz 30**
- From:** 89. Al-Fajr | 1
- To:** 89. Al-Fajr | 23
- Qari:** Default ('Abdul Bāsiṭ 'Abd us-Samād)
- Repeat each ayah:** 1
- Repeat the whole range:** off
- English translation after each ayah** (Saheeh International, Ibrahim Walk) ☐
- Tafsir after each ayah, read by the device** ☐
- Advanced:** 23 ayāt · page 593 · 23 ayahs plays in total · ≈ 2 min
- Buttons:** Cancel | Listen

Text view — understand what you memorise

- The same page, ayah by ayah, with the meaning of every word under it.
- Pinch (or A- A+) to make the text larger — it re-wraps, nothing goes off the screen.
- Tap the small play button beside an ayah to play from there to the end of the page.
- ≡ Mushaf takes you back to the printed page.

Understanding the words makes memorising far easier — and the recitation more sincere.

Five translations to choose from

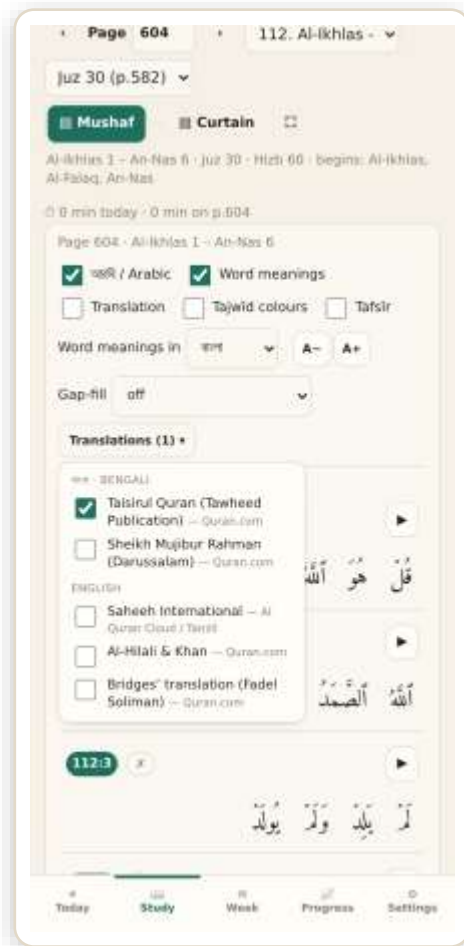

বাংলা • Bengali

- Taisirul Quran (Tawheed Publication)
- Sheikh Mujibur Rahman (Darussalam)

English

- Saheeh International
- Al-Hilali & Khan
- Bridges' translation (Fadel Soliman)

Tick as many as you like. Each ayah then shows them one under another, with the translator's name — so you always know whose words you are reading.

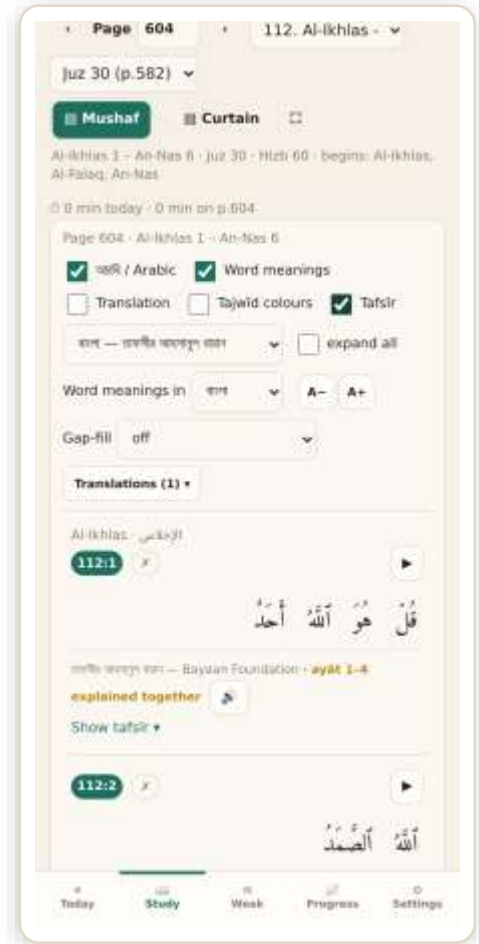

IN TEXT VIEW AND IN STUDY

Tafsīr — and the device can read it aloud

- Three editions: তফসীর আহসানুল বায়ান and তফসীর ইবনে কাসীর in Bengali, Tafsir Ibn Kathir in English.
- It sits folded under each ayah — tap “Show tafsīr” to open it.
- The loudspeaker button reads it aloud with your device’s own voice (choose the voice in Settings → Audio).
- Shown exactly as published, with the publisher named.

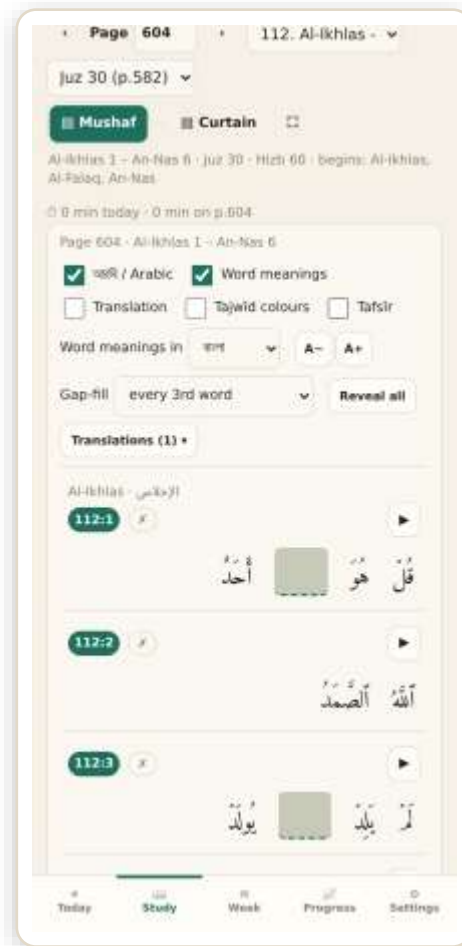

The reading voice is your phone’s built-in voice, not a recording — install a different voice in the phone’s settings if you prefer another.

Gap-fill — the classic drill

- Hide every 3rd or 5th word, the first or last word of each ayah — or every word.
- Recite from memory; tap a blank when you want to check that word.
- “Reveal all” shows everything again.
- The visible words are your prompts; the hidden ones are what your memory must supply.

Excellent for a page that is nearly firm but not yet flawless.

Marking the places that trip you

Stumble mark

Tap X beside an ayah when you slip. Those pages are put first in the day's revision. Tap again when it no longer troubles you — the record is kept.

Yellow highlight

Tap any Arabic word in Text view to mark it yellow — for the word that keeps catching your tongue.

Notes

Attach a note to one ayah or to the page: a teacher's correction, a reminder, a connection you noticed.

Look-alike verses

Nearly identical ayāt shown side by side with the differing words marked — the commonest cause of mistakes in later hifz.

TWO MORE HELPS

Your own voice, and a video lesson

Recite & compare

Record yourself reciting an ayah or a page, then listen: the qari first, then you, one after the other.

Recordings never leave your device.

Video lesson

Every page is linked to its lesson in the “Page by Page Tafseer” series of Shaykh Dr. Ahsan Hanif (Tawheed Outreach, YouTube).

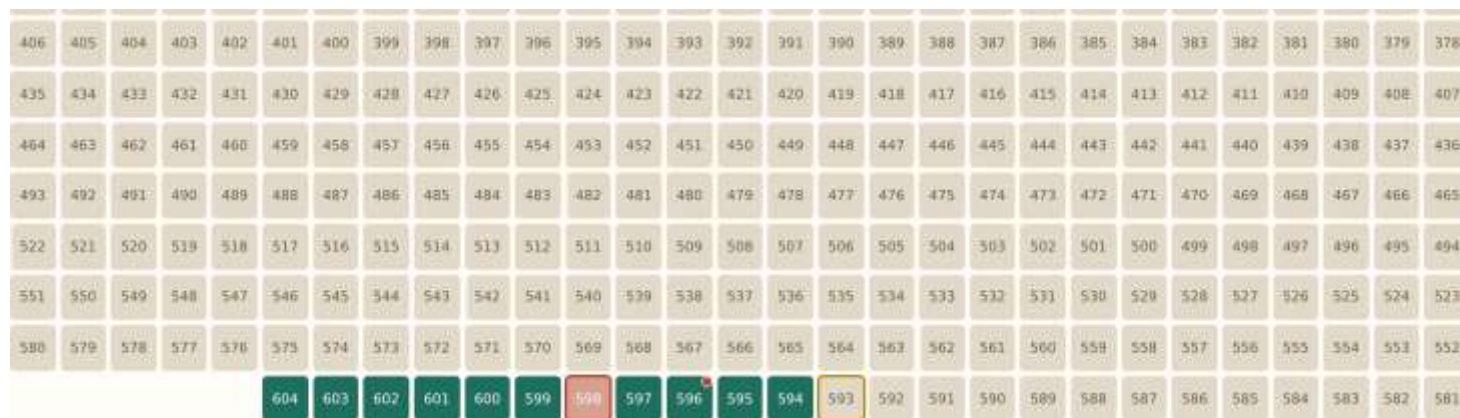

Watch it beside the page, or open it on YouTube.

Hearing your own recitation next to the qari's shows you what a teacher would tell you.

TAB 4

Progress — the whole Mushaf at a glance

- 604 tiles, one for every page, numbered. Filled = memorised. Tap a tile to open that page in Study.
- The practice calendar and your day streak; weak pages, and the ayāt you marked X.
- The next twelve weeks, and the date you are heading for at this pace.

Seeing the map fill up, week by week, is a quiet encouragement.

Settings — set once, then forget

Plan

Where you start, which direction, and how much a week: a whole page, a half, a third or a quarter.

Audio

Your qari, sound quality, downloads, the English translation voice, and the read-aloud voice.

Mushaf

Light or dark, page layout, and which translations appear in Text view.

Data

Offline use, sync between your devices, backup and restore.

SETTINGS → DATA

Works without internet · follows you between devices

- Offline use: keep the app and the Mushaf pages on the device — it then opens with no internet at all.
- Audio: download this week's pages (Settings → Audio, or the Week tab).
- Sync: your progress can follow you from phone to computer through your own Google Drive — optional, and set up once.
- Your progress is stored on your device. Nothing is sent anywhere else.

Useful before a journey: download the audio and keep the pages, and the app works in the air.

A day, in five steps

- 1 **Open Today** and read the card: it tells you what to do.
- 2 **Listen to the passage** with the qari — repeat each ayah a few times.
- 3 **Turn on the Curtain** and recite from memory, line by line.
- 4 **Mark X where you slipped** and do those ayāt again.
- 5 **Tap ✓ Practised today** and close the app.

Ten to twenty minutes, every day, is worth more than three hours once a week.

Begin today

Open the link, choose your page, and let the app carry the planning.

mazhar17.github.io/hc

Stuck? The ? button at the top of the app opens Help & About — every feature is explained there, with the sources of everything the app shows.
